

Products/ Applications

Bi-Metal	Matrix II Production	Matrix II cutting edge. Suited for general cutting mild steel, small solids and bundles of structural.	
	M42-High Performance	M42- cutting edge. Suited for a wide variety of steel, mild to hard-to-cut alloys. Larger solids and bundles.	
	M51-High Performance	M51- cutting edge. High hardness suited for super alloy and stainless steel. Positive hook rake angle.	
	M42- Premium	M42- Ground Tooth from Germany. Suited to long production runs. Cuts a wide variety of Steel, Hard to cut alloys and stainless.	
Carbide	Carbide Tipped	Tungsten Carbide Teeth available in two styles, Multi Chip and Tri Chip. Suited for very hard and very abrasive materials.	
	Carbide Grit Edge	Tungsten Carbide Grit Fused to a suitable backer. Continuous and gulletted edge, for cutting abrasive and hard materials.	
Carbon	Carbon Hardback	Tempered Teeth and back edge. Available in regular tooth for cutting mild steel and hook tooth for cutting non-ferrous metals.	
	Carbon Flexback	Tempered Teeth Available in Hook Tooth for production cutting and Regular Tooth for finer cuts. For wood & non-ferrous metal.	

Saw Blades
